Rules and rates

You may be eligible for a lower rate. Find out about optional rates or view a complete list of rules and rates, visit www.pge.com or call 1-800-743-5000.

If you believe there is an error on your bill, please call 1-800-743-5000 to speak with a representative. If you are not satisfied with our response, contact the California Public Utilities Commission (CPUC), Consumer Affairs Branch (CAB), 505 Van Ness Avenue, Room 2003, San Francisco, CA 94102, 1-800-649-7570 or 7-1-1 (8:30 AM to 4:30 PM, Monday through Friday) or by visiting www.cpuc.ca.gov/complaints/.

To avoid having service turned off while you wait for the outcome of a complaint to the CPUC specifically regarding the accuracy of your bill, please contact CAB for assistance. If your case meets the eligibility criteria, CAB will provide you with instructions on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is under review to keep your service turned on.

If you are not able to pay your bill, call PG&E to discuss how we can help. You may qualify for reduced rates under PG&E's CARE program or other special programs and agencies may be available to assist you. You may qualify for PG&E's Energy Savings Assistance Program which is an energy efficiency program for income-qualified residential customers.

Important definitions

Rotating outage blocks are subject to change without advance notice due to operational conditions.

Demand charge: Many non-residential rates include a demand charge. Demand is a measurement of the highest usage of electricity in any single fifteen (or sometimes five) minute period during a monthly billing cycle. Demand is measured in kilowatts (or kW). High demand is usually associated with equipment start-up. By spreading equipment start-ups over a longer period of time, you may be able to lower demand and reduce your demand charges.

Time-of-use electric prices are higher every day during afternoons and evenings, and lower at other times of the day. Prices also change by season, with higher prices in the summer and lower prices in the winter.

Wildfire Fund Charge: Charge on behalf of the State of California Department of Water Resources (DWR) to fund the California Wildfire Fund. For usage prior to October 1, 2020, this charge included costs related to the 2001 California energy crisis, also collected on behalf of the DWR. These charges belong to DWR, not PG&E.

Power Charge Indifference Adjustment (PCIA): The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay for the above market costs for electric generation resources that were procured by PG&E on their behalf. 'Above market' refers to the difference between what the utility pays for electric generation and current market prices for the sale of those resources. Visit www.pge.com/cca.

Wildfire Hardening Charge: PG&E has been permitted to issue bonds that enable it to recover more quickly certain costs related to preventing and mitigating catastrophic wildfires, while reducing the total cost to its customers. Your bill for electric service includes a fixed recovery charge called the Wildfire Hardening Charge that has been approved by the CPUC to repay those bonds. The right to recover the Wildfire Hardening Charge has been transferred to a separate entity (called the Special Purpose Entity) that issued the bonds and does not belong to PG&E. PG&E is collecting the Wildfire Hardening Charge on behalf of the Special Purpose Entity. For details visit: www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_JF.pdf.

Recovery Bond Charge/Credit: Your bill for electric service includes a charge that has been approved by the CPUC to repay bonds issued for certain costs related to catastrophic wildfires. The Recovery Bond Charge (RBC) rate is currently \$0.00857 per kWh. PG&E has also contributed certain amounts to a trust fund which is used to provide a customer credit equal to \$0.00857 per kWh (Recovery Bond Credit). The right to recover the RBC has been transferred to one or more Special Purpose Entities that issued the bonds and does not belong to PG&E. PG&E is collecting that portion of the RBC on behalf of the Special Purpose Entities.

Gas Public Purpose Program (PPP) Surcharge. Used to fund state-mandated gas assistance programs for low-income customers, energy efficiency programs, and public-interest research and development.

Visit www.pge.com/billexplanation for more definitions. To view most recent bill inserts including legal or mandated notices, visit www.pge.com/billinserts.

See the table reflecting "Your Electric Charges Breakdown" on the last page

"PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation. © 2026 Pacific Gas and Electric Company. All rights reserved.

How Your True-Up is Calculated

This is your True-Up statement. You are now being billed for your Total NEM Charges, which represents the total charges for energy used, net of any credits for energy exported to the grid. Additionally, applicable charges and taxes are billed at True-Up.

Since this is your **True-Up statement**, all electric usage charges and credits are reset to zero starting with your next billing cycle.

The True-Up calculations are:

Total NEM Charges Before Taxes	\$5,659.49
Total NEM Charges	\$5,659.49

ENERGY STATEMENT

Service Agreement ID: 4692494679 P003
Rate Schedule: AG5B Large Time-of-Use Agricultural Power

NEM Charges Before Taxes

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Additional Messages

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

Thank you for choosing to go solar with PG&E. To understand how solar Net Energy Metering (NEM) works, understand your bill, and how to track towards your True-Up, please visit www.pge.com/commercialnem

TOTAL	760	-2716	8030	6074	\$1,508.64

Differences may occur due to rounding.

Demand charges are not included in this table.

Explanation of Calculations

This is a monthly reconciled NEM statement. Your Total NEM Charges are shown in the table below. Your last monthly bill of the True-Up period (True-Up Statement) will occur in (08/2025).

YTD NEM Charges Before Taxes		\$1,508.64
YTD Non-Bypassable Charges	239.60	
Previously Billed NEM Charges		-1,167.30
Total NEM Charges		\$341.34

Calculation details: Each monthly billing period, you will see your YTD NEM Charges, which represent the total charges for energy used, net of any credits for energy exported to the power grid. Each month, the amount owed will be determined by the charges and credits you accrued since the beginning of your Annual True-Up period. The Annual True-Up process allows you to use credits generated in a given month to offset charges across other monthly billing periods within the year. The amount owed in a given month or True-Up period, however, cannot be lower than the sum of your YTD State Mandated Non-Bypassable Charges. In addition, generation is always charged, if positive.

To calculate what is owed in a given monthly billing period, the greater of the following Year-to-Date (YTD) charges accrued since the start of your Annual True-Up period is determined:

1) YTD NEM Charges Before Taxes (inclusive of Generation Charges¹)

All Previously Billed NEM Charges within the current Annual True-up period are subtracted from your Total NEM Charges. If your Previously Billed NEM Charges are greater than your YTD NEM Charges, you will see a credit to your account. All charges and credits will be reset to zero at True-Up.

Fixed charges and demand charges are billed separately each month and cannot be offset by NEM energy credits.

¹ Generation Charges are commodity costs related to energy usage. You can go to pge.com/electricrates to find the generation component of your electric charges.

² Refer to the Details of NEM Charges page in this bill for more information about the State Mandated Non-Bypassable Charges.

Summary of NEM Charges

Bill Period End Date	Net Peak Usage (kWh)	Net Off Peak Usage (kWh)	Net Usage (kWh)	Estimated NEM Charges Before Taxes
06/10/2026	-1	2	1	\$0.41
TOTAL	-1	2	1	\$0.41

Differences may occur due to rounding.

Demand charges are not included in this table.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (**05/2027**).

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Summary of NEM Charges

Bill Period End Date	Net Peak Usage (kWh)	Net Off Peak Usage (kWh)	Net Usage (kWh)	NEM Charges Before Taxes
06/10/2026	11	98	109	\$24.15
TOTAL	11	98	109	\$24.15

Differences may occur due to rounding.

Demand charges are not included in this table.

Explanation of Calculations

This is a monthly reconciled NEM statement. Your Total NEM Charges are shown in the table below. Your last monthly bill of the True-Up period (True-Up Statement) will occur in (05/2027).

YTD NEM Charges Before Taxes		\$24.15
YTD Non-Bypassable Charges	4.75	
Previously Billed NEM Charges		0.00
Total NEM Charges		\$24.15

Calculation details: Each monthly billing period, you will see your YTD NEM Charges, which represent the total charges for energy used, net of any credits for energy exported to the power grid. Each month, the amount owed will be determined by the charges and credits you accrued since the beginning of your Annual True-Up period. The Annual True-Up process allows you to use credits generated in a given month to offset charges across other monthly billing periods within the year. The amount owed in a given month or True-Up period, however, cannot be lower than the sum of your YTD State Mandated Non-Bypassable Charges. In addition, generation is always charged, if positive.

To calculate what is owed in a given monthly billing period, the greater of the following Year-to-Date (YTD) charges accrued since the start of your Annual True-Up period is determined:

1) YTD NEM Charges Before Taxes (inclusive of Generation Charges¹)

All Previously Billed NEM Charges within the current Annual True-up period are subtracted from your Total NEM Charges. If your Previously Billed NEM Charges are greater than your YTD NEM Charges, you will see a credit to your account. All charges and credits will be reset to zero at True-Up.

Fixed charges and demand charges are billed separately each month and cannot be offset by NEM energy credits.

¹ Generation Charges are commodity costs related to energy usage. You can go to pge.com/electricrates to find the generation component of your electric charges.

² Refer to the Details of NEM Charges page in this bill for more information about the State Mandated Non-Bypassable Charges.

Additional Messages

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

Thank you for choosing to go solar with PG&E. To understand how solar Net Energy Metering (NEM) works, understand your bill, and how to track towards your True-Up, please visit www.pge.com/commercialnem

06/10/2026	0	\$0.00
TOTAL	0	\$0.00

Differences may occur due to rounding.

Demand charges are not included in this table.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (**05/2027**).

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Differences may occur due to rounding.

Demand charges are not included in this table.

How Your True-Up is Calculated

This is your True-Up statement. You are being billed for the State Mandated Non-Bypassable Charges which are based on your energy usage (kWh) from the grid and any other applicable charges and taxes. These amounts are due at True-Up.

Since this is your **True-Up statement**, all electric usage charges and credits are reset to zero starting with your next billing cycle.

The True-Up calculations are:

Total NEM Charges Before Taxes	\$1,244.23
Total State Mandated Non-Bypassable Charges	1,341.02
Total NEM Charges	\$1,341.02

06/10/2026	-6533	-793	9967	2641	\$952.15
TOTAL	-6533	-793	9967	2641	\$952.15

Differences may occur due to rounding.
Demand charges are not included in this table.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (05/2027).

YTD NEM Charges Before Taxes	\$952.15
YTD Estimated NEM Charges At True-Up	\$952.15

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Additional Messages

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

Thank you for choosing to go solar with PG&E. To understand how solar Net Energy Metering (NEM) works, understand your bill, and how to track towards your True-Up, please visit www.pge.com/commercialnem

Differences may occur due to rounding.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

You may be eligible for Net Surplus Compensation (NSC) at True-Up if your **Net Usage (kWh)** is negative. Your NSC is calculated at True-Up based on that month's market prices. If this were your True-Up statement, your estimated NSC would be -\$32.80 (-1,146 kWh @ \$0.028620/kWh).

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (**10/2026**).

Summary of Your Year-to-Date (YTD) NEM Charges

Service For: SE NE NW 2 17 19 # 13

Service Agreement ID: 4695719808 P052

Rate Schedule: AG5C Large Time-of-Use Agricultural Power

Summary of NEM Charges

Bill Period End Date	Net Peak Usage (kWh)	Net Off Peak Usage (kWh)	Net Usage (kWh)	Estimated NEM Charges Before Taxes
06/10/2026	-1	2	1	\$0.41
TOTAL	-1	2	1	\$0.41

Differences may occur due to rounding.

Demand charges are not included in this table.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (**05/2027**).

YTD NEM Charges Before Taxes	\$0.41
YTD Estimated NEM Charges At True-Up	\$0.41

Service For: SE NE NW 2 17 19 # 13
Service Agreement ID: 4695719808 P052
Rate Schedule: AG5C Large Time-of-Use Agricultural Power

NEM Charges Before Taxes

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Additional Messages

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

05/12/2026	2	32	33	5.39
TOTAL	15	118	131	\$21.64

Differences may occur due to rounding.

Explanation of Calculations

This is a monthly reconciled NEM statement. Your Total NEM Charges are shown in the table below. Your last monthly bill of the True-Up period (True-Up Statement) will occur in (12/2026).

YTD NEM Charges Before Taxes	\$21.64
Previously Billed NEM Charges	-16.25
Total NEM Charges	\$5.39

Calculation details: Each monthly billing period, you will see your YTD NEM Charges, which represent the total charges for energy used, net of any credits for energy exported to the power grid. Each month, the amount owed will be determined by the charges and credits you accrued since the beginning of your Annual True-Up period. The Annual True-Up process allows you to use credits generated in a given month to offset charges across other monthly billing periods within the year.

All Previously Billed NEM Charges within the current Annual True-up period are subtracted from your Total NEM Charges. If your Previously Billed NEM Charges are greater than your YTD NEM Charges, you will see a credit to your account. All charges and credits will be reset to zero at True-Up.

Fixed charges and demand charges are billed separately each month and cannot be offset by NEM energy credits.

¹ Generation Charges are commodity costs related to energy usage. You can go to pge.com/electricrates to find the generation component of your electric charges.

Differences may occur due to rounding.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement (**12/2026**).

YTD NEM Charges Before Taxes	\$27,590.44
YTD Estimated NEM Charges At True-Up	\$27,590.44

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

How Your True-Up is Calculated

This is your True-Up statement. You are being billed for the State Mandated Non-Bypassable Charges which are based on your energy usage (kWh) from the grid and any other applicable charges and taxes. These amounts are due at True-Up.

Since this is your **True-Up statement**, all electric usage charges and credits are reset to zero starting with your next billing cycle.

The True-Up calculations are:

Total NEM Charges Before Taxes	\$1,635.64
Total State Mandated Non-Bypassable Charges	1,896.92
Total NEM Charges	\$1,896.92

ENERGY STATEMENT

Rotating Outage Block	3I

Additional Messages

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

Thank you for choosing to go solar with PG&E. To understand how solar Net Energy Metering (NEM) works, understand your bill, and how to track towards your True-Up, please visit www.pge.com/commercialnem

Visit www.pge.com/guidenema to get your guide to Net Energy Metering Aggregation billing.
